

47

reliable tests

OVER THE 12-MONTH PLAN

12

LIKELY WINS

\$21.4M

LIKELY GROWTH VALUE

Mid-market apparel retailer with a product-to-checkout bottleneck.

LIKELY WINS

12

based on a 25% win rate

Conservative 8 Upside 16

HOMEPAGE LIFT

77.2%

visitor who reaches a product page, after wins launch

Conservative 46.4% Upside 114.4%

LIKELY ADDED VALUE

\$21.4M

after winning changes launch

Conservative \$12M Upside \$31.9M

YOUR EXPERIMENTATION RUNWAY

Your traffic could support about 67 tests.
This plan puts 47 of them on the calendar.

Your team’s launch pace is the limiter here—not visitor traffic.

VALUE BRIDGE

From today's results to the likely plan

Joint funnel Homepage → Product page → Checkout at 52.2% × 9.1% × 69.0%. \$185.00 per completed order. This is modeled conversion value, not audited revenue, cash timing, lifetime value, or ROI.

CUMULATIVE VALUE PATH

How value builds after winners ship

Low · P10 Likely · P50 High · P90

LIKELY COMPOSITION Homepage Product page Checkout

P10–P90 range and P50 path across 1,000 seeded simulations. Colored areas stack to P50 using page shares from one representative near-median path.

12-MONTH RUNWAY

A representative likely path

Completed test Winner deployed Client readout

Tests keep running through readout dates. Winners begin contributing only after their test completes.

CLIENT UPDATE RHYTHM

27 updates, about every 14 days

Each update shows what has finished, what has shipped, and what is still running on the representative likely path.

UPDATE 1 · DAY 14	FINAL · DAY 365	
1 tests complete	47 tests complete	
0 wins shipped · 1 live	12 wins shipped · 0 live	
\$0 value unlocked	\$21.4M value unlocked	

WHERE TO FOCUS

Two honest views of opportunity

Traffic-supported capacity

Pages that can sustain the most reliable learning.

01	Homepage	26 tests
02	Checkout	24 tests
03	Product page	18 tests

Direct modeled value

Pages prioritized by value supplied in this scenario.

01	Homepage	\$14.7M
02	Product page	\$4.4M
03	Checkout	\$2.1M

PAGE	ONE RELIABLE TEST	LIKELY TESTS	LIKELY WINNERS	PAGE LIFT	LIKELY ADDED VALUE
Homepage visitor who reaches a product page	14 days 102.9K visitors	24	6 4–8 range	77.2% 46.4%–114.4% range	\$14.7M
Product page visitor who starts checkout	22 days 204.6K visitors	12	3 1–5 range	19.1% 6.0%–33.8% range	\$4.4M
Checkout completed order	18 days 15.4K visitors	11	3 1–5 range	9.3% 3.0%–15.9% range	\$2.1M

What the plan says, in plain English

- | | |
|----|---|
| 01 | At the selected delivery pace, Thornfield & Co can complete about 47 reliable tests over 365 days. Current traffic could support about 67, so the gap is visible rather than hidden. |
| 02 | With a 25% win-rate assumption, the likely path produces 12 deployable winners , with 8–16 across the conservative-to-upside range. |
| 03 | Conversion lift is kept page-specific. A leading page outlook is Homepage at 77.2% . |
| 04 | The plan could add \$21.4M after winning changes launch, using only values supplied here. It does not invent downstream value or call this ROI. |
